

PD04 - Chronic Illness (Pain) - Migraines and PD 4

Post by “Matt” of January 19, 2021 at 12:50 PM

I used to get very serious dizzy spells when I was a little kid, I don't know if it was an inner ear thing or what, but it seems to have subsided when I turned 12 or so and I used to get some serious headaches but fortunately now they seem to be manageable just with ibuprofen.

But even though we experience pain, we can still have plenty of pleasure!
