

Commissioning Original Epicurean Artwork

Post by "Joshua" of March 28, 2021 at 12:01 AM

My monogrammed leather keychain fob broke off a few weeks ago, and I'm looking for an alternative. Thinking about having a laser engraving done in either metal or wood, with maybe a quote on the back. This is something I've just put together as an idea. I also have a vector version of the same image--I see from Cassius' post above that I'll have to compress that to a .zip to upload it, which I will certainly do if anyone is interested!
