

Is There A Relationship Between "Anticipations" and "Instinct"?

Post by "Don" of April 24, 2021 at 11:14 AM

@Nate , the three-part brain ****may**** be an analogy/metaphor to simplify an explanation of human nature but it shouldn't be taken to describe the anatomy of the brain. You bring up an interesting point about the ubiquity of 3s and 4s. Maybe something about completion or the satisfying arrangement you can get from 3 (triangle) or 4 (square) objects.
