At some point, I'll try and go through and give the citations for the E7, 15F, etc. Those are primarily ancient text references that I can simply provide the citations for. I don't feel I can copy and share that entire section but I felt sharing the 5 pages was well within copyright bounds.

That being said, I find Long and Sedley's interpretation to be sophisticated, intellectually satisfying, well within Epicurus's overall philosophy, and practical.
