According to this, there are at least 3 books in *On Signs and Methods of Inference* contained in PHerc 1065.

It also lists *On Methods of Inference* (1978)

Is Delacy a full translation of PHerc 1065?

I'd suggest we take a closer look at the paper by Manetti.

PS According to chapter 2 of Delacy, his work does appear to be a translation of PHerc 1065. If you read that chapter, it also seems to allude to the *On Signs* alternative title.
