[Quote from Cassius](#)

it is possible for any individual or group of individuals to perceive the experience of pleasure as greater or lesser, and to that I would say "surely so."

Ah! But does even your own personal perception of the experience hold for every situation? Here I go with the hypotheticals again 😊

If someone were to wake you in the middle of

the night and ask if you wanted a chocolate candy, would it be as pleasurable as if you were at leisure in the backyard with an open bag?

If you were sick with a stomach ache, would the thought of eating the chocolate candy be as pleasurable?
