

Episode One Hundred Seventeen - Letter to Herodotus 06 - The Doctrine of Infinity of Worlds And Its Implications

Post by "Cassius" of April 10, 2022 at 11:09 AM

Ok having just completed the podcast recording I am "proud" to say that we have spent the ENTIRE episode on a single passage!

[Quote from Cassius](#)

Furthermore, there are infinite worlds both like and unlike this world of ours. For the atoms being infinite in number, as was proved already, are borne on far out into space. For those atoms, which are of such nature that a world could be created out of them or made by them, have not been used up either on one world or on a limited number of worlds, nor again on all the worlds which are alike, or on those which are different from these. So that there nowhere exists an obstacle to the infinite number of the worlds.

However even though we didn't move fast I think this is going to prove one of our more important and beneficial episodes, because we got into a lot of important issues about the implications of it.

Get ready for a discussion of nihilism, meaningfulness, and even "eternal recurrence!"

We'll move to "images" next week.
