

FORUM USAGE: TIPS AND TOOLS

Post by "Cassius" of May 2, 2022 at 7:57 AM

I just realized this weekend (it was pointed out to me by Kalosyni) that the "Latest Posts" link (which I have now added to the main menu top-level menu as "RECENT") will show you not only the latest posts in the Forum sections, but also latest entries on the "Walls" of each user.

i tend to navigate the forum by looking for the red dot on the "bell" icon that's at the top of the page, but that "bell" doesn't notify you of posts on peoples' walls. i am looking for a way to produce a "red dot" that indicates ALL new posts to the website, so if I can figure out how to produce that I will implement it and post about it.

In the meantime, clicking on the "FORUM / Latest Posts" dropdown menu, or on the "RECENT" menu item in the top-level menu, should produce a list of most ALL recent activity on the forum.
