

# Using Dynalist As An Easy Way To Outline From The General To The Particular

**Post by “Godfrey” of November 4, 2022 at 10:49 AM**

[Cassius](#) since you first mentioned Dynalist a week or so ago, I've been experimenting with it and I'm finding it easy to use and extremely useful for all sorts of things. It is definitely giving me a way to improve my note-taking. I've never used outlining much, but it's turning out to be a powerful tool and this app is a great tool for implementing that tool, if you will.

It's seamless between my phone, tablet and computer. Although the computer version has a bit more functionality, the phone/tablet version has plenty. And it took very little time to get up and running on both versions. Most of the questions that I had, which I hadn't really looked into, you just answered in the above post.
