Unfortunately, I don't think I'm onboard with that.

There are no "lower case" goods. From what I read, there are "goods" (αγαθός) as a category and there is "the good" (ταγαθον < το "the" + αγατθον "good").

Dammit, [Don](#) ! 😡 😊

I could have sworn I saw you say that in the other thread. But that's fine. Can't force agreement.
