

Zoom Meeting For The European Time Zone - Feb 25, 2023

Post by "Cassius" of February 10, 2023 at 8:12 AM

We have received a request for zoom meetings which are more accessible to European time zones. Currently all our zooms have been in the evening Eastern time, and that places it in the middle of the night in Europe.

We definitely plan to do at least one such session soon, and if we have enough interest we will do it regularly. Of course nothing stops our current European participants from organizing their own zooms, but for the maximum benefit of all I am sure our "American hemisphere" friends would like to meet and interact with the Europeans.

The first obvious choice for us to open this up to the widest audience would be for us to set something on a Saturday in the morning or early afternoon Eastern time. Possibly 1:00 or 2:00 pm Eastern would make it an evening session for Europe and still not too early for California (?)

If you are interested in participating in a Saturday zoom at around 1:30 Eastern USA time please respond to this thread and we will get something set up as soon as the next couple of weeks. At least at the first one focus would be to spend time just getting to know our European friends better.
