Yep. Notifications (not push notifications, just the red dot on the top right), unread posts (red dot top left), and heavy use of the "recent" tab. Also, the chat box that pops up from bottom right never fails to drive me to distraction. When I try to make it go away it gets bigger...when I do finally manage to close it I just go the notifications area and click on whatever chat I haven't read, and read it there. There's probably a way to disable that from my settings...
