I've been listening to an audiobook by Matthew Stewart called "Nature's God; The Heretical Origins of the American Republic."

I am still in the early chapters, but his project is to trace the Deism of Ethan Allen, Thomas Paine, Benjamin Franklin, etc--and the list is quote long--back through Charles Blount, John Locke, Baruch Spinoza, and finally through Lucretius and back to Epicurus. I cannot really review it at this time (although I might recommend a paper copy as easier to read carefully), but I am finding it very interesting.
