We have both regretted the absence of a collection of the now available fragments of Peri Physeos.

Welcome. I agree having a collection of Epicurus's On Nature fragments would be ideal. The only such collection "readily" available is in the French publication, Les Epicuriens [Bibliotheque de la Pleiade] produced by Daniel Delattre and Jackie Pigeaud.

Hiram Crespo gave a summary of the books of On Nature on his Society of Epicurus website:

[Epicurus' On Nature I-X | Society of Friends of Epicurus](#)

[Epicurus' On Nature - Books XI-XIV | Society of Friends of Epicurus](#)

[On Nature: Books XXV and XXVIII | Society of Friends of Epicurus](#)

David Sedley wrote a paper and translated the whole of what is left of On Nature Book 28:

[Epicurus, On nature, book 28](#)

Epicurus, On nature, book 28

To get an idea of what's been retrieved from On Nature, here is a link to the Greek papyri transcriptions:

I know that's not a thorough collection, but hopefully that begins to gather the scattered fragments together.
