

What If Anything Has Changed About Human Nature In the Last 2000 Years?

Post by “Don” of January 5, 2024 at 12:20 AM

[Quote from BrainToBeing](#)

"Has the human brain changed in the last couple of thousand years?"...And, to answer IMO, the human brain has changed little in the ensuing 2000+ years.

I would completely agree. In fact, I would argue the human brain hasn't changed much since we evolved to evade predators, organize hunts, gather beneficial plants, and begin to tell stories around the fire. Human brains seem to have taken their modern shape about 300,000 years ago. The rest is culture.
