

# Dealing With Electric Grid Disruption

**Post by "Cassius" of May 11, 2024 at 8:23 AM**

As noted above these posts were split off from the Solar Flare discussion.

The topic of self-sufficiency in times of crisis is a subset of "Ethics" or "Lifestyle," and independent, but equally or more important, than the "prediction" aspect.

So let's post about the "dealing with" aspects of solar flares in this subforum, where it is nearby with other "disaster scenario" threads, and keep the "prediction and extent of" aspects in the other thread in the Physics section.

[Julia](#) if you would like to tweak the first post or the thread title in this subforum please feel free to do so.
