

Logo Placement

Post by "Cassius" of June 2, 2024 at 4:15 PM

I noted this morning thanks to joshua that the main forum logo was not centered on the home page for the "Colorplay Blue" style. I am not sure why that was the case as I thought I fixed it during the last style upgrade. I have fixed it now, but the fact i didn't fix it already makes me worry there might have been a reason why i didn't fix it before 😊

At any rate, if anyone has any issues with the main logo placement (left-justified vs center justified) in any theme they are using, please let me know and I will fix that.

Most people are probably using cell phones most of the time and this isn't much of an issue, but on laptop or larger screen people might have a preference.
