

Aspects of Pleasure - Dopamine, Endorphine, Continuity

Post by “Matteng” of November 8, 2024 at 11:53 AM

What is perhaps missing (Cicero/Cyrenaics/many peoples opinion):

What speaks against the idea that intense sensual pleasures go beyond the limit of absence of pain? (my ideas: short-livedness, negative consequences of maintaining these pleasures e.g. numbness, hedonic treadmill, costs, ungratefulness, harming friendships and other values (which are in core Pleasure) ...)

Your thoughts ?
