

Theories of Time - University of Oregon Webpage

Post by “Kalosyni” of December 26, 2024 at 9:07 AM

From post 3 quote above (and from Joshua's first link):

Quote

The idealist view is that time is a property of the human mind and therefore is an illusion. The passage of time is depends on human observers.

In last night's Zoom, I recall something from the material that said: "time is by necessity" ? ...Did I remember correctly and was it by Philodemus?

Imagine that we lived on a planet that rotated the sun, but did not itself rotate (but always stayed with the same side facing the sun) and did not have a moon. Life would evolve without circadian rhythms, and would that lead to a lack of the conception of time in evolved/sentient life forms?
