

# Vegetarianism

**Post by “Eikadistes” of January 8, 2025 at 9:06 AM**

I was a vegetarian between 16 and 24. It suited me OK. To each their own with diet.

Last year, we learned that my wife's EPI medication can only be produced from pig pancreas, so the slaughter of human-like creatures with rational thought is, *sadly* a necessity to people with illnesses.
