It knows everything. 🤪

Ask it anything, no matter how absurd.

🌟 AI Overview

It's impossible to give a precise number of gorillas that would fit in a short bus. The answer would depend on the size of the gorillas, the size of the short bus, and how tightly they are packed. However, a shortbus (also known as a school bus) typically holds around 20-30 students, and gorillas are larger than children. It's safe to assume that a short bus could comfortably hold a smaller number of gorillas than students, possibly 5-10 adult gorillas, depending on the specific gorilla and bus sizes.
