I don't have any good links in English yet but this year's symposium in Athens Greece is coming up this weekend. Here's a PDF in Greek of the agenda - if someone knows a good way to get this in English please link it in this thread

I was not able to open the link provided.

I did open this root URL

If we can get access to pdf docs of the presentations (in Greek I expect), the Google translation gives us some ideas of the message's.
