Just coming back to this. GREAT JOB finding the English translation option. I'll have to check some of these out. Some of those presentation titles are interesting

... and others are "*interesting*" (said with a quizzical rising tone): *Gilgamesh: The Epicurean Human at the Dawn of History?* (Maybe Enkidu? Not sure about Gilgamesh... I'll have to give them the benefit of doubt until I listen); *The Physics of Epicurean Philosophy: Connections with Modern Physics* (This kind of thing always gives me pause).
