

A. Le Grand's Divine Epicurus

Post by “TauPhi” of June 4, 2026 at 9:20 PM

I'm sorry to resurrect this thread after 5 years of inactivity, but if anyone's interested in this 350 years old book, I've restored it and prepared a modern PDF version.

The original book contains around 50 marginalia, mostly in Latin. I've moved these into footnotes and I've provided rough English translations. The marginalia aren't essential to the text and they serve mostly as reinforcements of discussed topics. I've also added interactive table of contents. Other than that, I've tried to be as faithful to the original as possible. The original scan of the book is available at archive.org (link below).

[Cassius](#) : You can add this to the files section if you find it worthwhile. Everything is in public domain as indicated at the end of the PDF. The book is not particularly valuable as an educational resource, but I think it's historically interesting.
