

Relationship between AI/LLMs and prolepsis

Post by “Cassius” of June 12, 2026 at 3:17 PM

Titus I would say that that discussion of a working theory of what Epicurus mean by prolepsis is better than what 98% of us on the forum could do if we sat down and decided to devote 20 minutes to tackling it. I am sure that most of us would also find tweaks we would suggest but in general I think someone who followed this model would be in good shape. I think it does a pretty good job as well with what often seems to be the trickiest part - that anticipations are not in themselves opinions, but foundations on which opinions are generated.
