

# EpicureanFriends Site Glitches

**Post by “Cassius” of September 3, 2019 at 9:54 AM**

At 9:00 AM Tuesday we had an aborted upgrade which required a site restoral.

It appears that if you posted in the last 24 hours that your post may have been lost. I apologize to anyone whose post was lost. The only post I am aware of that may have been lost was a new thread I believe I started that mentioned Ayn Rand, so maybe losing that was for the best. 😊

We'll take steps to be sure that this does not happen again, and I want to apologize to anyone who was affected.
