

Is there intelligent life out there? You, too, can help in the search!

Post by “Godfrey” of February 15, 2023 at 2:20 PM

This article is in this morning's paper and it struck me as really cool for anyone here who's a sci-fi nerd. It also is a great example, for a non-scientist such as me, of the enormous amount of tedious work that can be involved in scientific progress.

UCLA is asking for the public's help in finding signs of extraterrestrial intelligence

[UCLA is asking for the public's help in finding signs of extraterrestrial intelligence](#)

Are we alone in the universe? Researchers at UCLA are trying to answer this question by asking citizen scientists to analyze signals captured by a giant radio...

www.latimes.com

There is a link within the article that leads to the UCLA website where you can participate. Or just look at the task involved, which is interesting conceptually but extremely tedious to do for any length of time.
