

Year Calculations

Post by “Cassius” of September 4, 2023 at 8:09 AM

For as long as we continue with the front page greeting and footer referencing the traditional calendars, we can plan to use the calculations from Wikipedia in the links below:

Thank You For Visiting EpicureanFriends.com, Where We Are Pleased To Be Alive In September Of The Year 2776 [AUC](#) And The 3rd Year Of The 700th [Olympiad](#)!

If someone thinks these calculations are not correct please let me know. Those Wikipedia links will stay in the footer version so they will always be easy to find.

Also, it may be tricky to know when to change the Olympiad year calculation, so if someone knows a good way to keep track of that, or sees that we fall behind in updating, please post about that too.

For the ancient Greek, I stick with Hellenion:

[Calendar - Hellenion](#)

AUC and Olympiad does a nice job hitting both the Roman and Greek calendars.
