

French (Burlamaqui and Rousseau) and German (D'Holbach) Followers of Epicurus (?)

Post by "Cassius" of December 16, 2023 at 8:00 AM

Here's an interesting article tracing Epicurean ideas from Epicurus to Jefferson through several French philosophers including Rousseau (who I have certainly heard of but am not very familiar with) and Burlamaqui (who I am not sure I have ever heard of before). Other than some discussion about Gassendi I don't think we have developed in the past to what extent these influential French thinkers embraced and accepted or deviated from Epicurus, or what they thought of Epicurus at all. Apparently this Burlamaqui was particularly influential in some of his phrasing, and might be the place Jefferson picked up "Pursuit of Happiness" as a phrase. I've only started to read the article but if anyone (particularly [Charles](#)) has insights into this I would like to begin to get a fix on whether we should consider some of these prominent Frenchmen to be pro-Epicurean or outside of the main line of Epicurean thought.

Couple of interesting comments:

Quote

All the references showing Jefferson's interest in Epicurus' philosophy known to me date back exclusively to this much later period in his life. This makes it unlikely, but not entirely impossible, that Epicurus' philosophy played a major direct role in Jefferson's thinking in July of 1776.

Also, sounds like D'Holbach's "System of Nature" is important for its anti-religious nature. Another German, Martin....

Looks like we may eventually need a separate thread on D'Holbach, especially if we can find him directly commenting on Epicurus.

Well this "System of Nature" certainly seems important. We'll need a link to an English translation....

A questionable paragraph!

<http://www.epicureanfriends.com/thread/3593-french-burlamaqui-and-rousseau-and-german-d-holbach-followers-of-epicurus/>

apparently he saw them as a major source of inspiration.

As was noted before, the reluctance to openly mention D'Holbach or Diderot, and their ideas as major sources of inspiration may also explain why much later in life, Jefferson ascribed his inspiration for thinking about happiness to Epicurus instead of to Diderot and D'Holbach, even though he praised them as virtuous persons, while he did not mention Locke, Wollaston, or Burlamaqui either. Epicurus was a very uncontroversial philosopher. He could not possibly have been a Christian, because he lived before Jesus of Nazareth. As a result, Epicurus, as a philosopher promoting virtuous behavior as a source of happiness, was a safe reference within the public discussion about the importance of religion in America, a discussion which is still very much alive today.

We also need "Christianity Unveiled" also by D'Holbach. Another reason for Martin to look further in D'Holbach! 😊

D'Holbach discussion moved here to focus on him exclusively:

Thread

[Paul Thyry \(Baron D'Holbach / Mirabaud\) - French / German Sympathizer With Some Epicurean Ideas](#)

Main page of resources on Paul Thyry / Baron D'Holbach / Mirabaud:

So the Epicurus "riddle" appears in D'Holbach's "[Good Sense](#):"

§57. When we ask, why so many miserable objects appear under the government of a good God, we are told, by way of consolation, that the present world is only a passage, designed to conduct man to a happier one. The divines assure us, that the earth we inhabit, is a state of trial. In short, they shut our mouths, by saying,...
