

Journal of happiness studies article on Epicurus

Post by “Elayne” of November 27, 2020 at 11:41 AM

[Godfrey](#) when I read people saying that absence of pain is boring, I am completely confused. That makes no sense whatsoever-- boredom is one of the pains, so that is like saying absence of pain is pain, or $0=1$. It's nonsensical. It makes me wonder if they have even read their own writing or thought about it. Where was their editor, lol?
