

Tactical Question for the Group Re Terminology In Discussing Reason and Logic

Post by "Godfrey" of January 19, 2021 at 5:35 PM

[Quote from Cassius](#)

In saying that, do you think that most of your friends with whom you might be discussing that would know what it means to "keep logic/reason subservient?" If they were to ask "what do you mean?" what would you say?

I would say to start and end with observations. Logic can help to evaluate observations, but for practical real world use logic must be verified through observations. Observations coming from the senses, feelings and pattern recognition.
