

Epicurean philosophy vs. Stoicism in public popularity

Post by "Godfrey" of March 13, 2021 at 9:04 PM

I haven't read Hermetimus so I can't compare them. I'm about halfway through Zen &c. I think Joshua described it as steeped in Plato and I agree with that. It's basically three interwoven threads: a father-son motorcycle trip, ruminations on the virtues of understanding technology, and a "Chautauqua" attempting to tie together and advance the academic development of philosophy (minus Epicurus, of course). That, and the first person narrator is piecing together the life of Phaedrus, who is himself teaching rhetoric before he went insane and had electroshock therapy. Plenty to chew on!
