I don't know if this is an example of the "[uncanny valley](#)" or not, but when I look at this picture it's just-it's just odd somehow...

This is LOT better than some and AI has come a LONG way (no more dead-eyed Polar Express), but yeah there's definitely still some side trips down there uncanny valley. I would have liked to see his hair a little more gray but overall seeing him in his prime was cool I'll admit.
