

Getting Started - Initial Thoughts on 3D Printing

Post by "Cassius" of April 28, 2021 at 9:25 PM

Agreed that one is much better!

Which reminds me to comment - I've never understood how anyone came up with the idea of the double-head. I suppose I can see that it saves stone that would otherwise be pretty useless showing the back of the head, but it seems awkward at best as a display mechanism and I would have thought someone with the resources to undertake a project like this would have had two pieces of stone available.
