That's good to know (that it's a claim, anyway) because I was thinking that the date of confirmation was more traceable to the small busts at Herculaneum. I'm not sure of the date of that one but maybe not so far apart (?) At any rate I would think this would be a key part of Frischer's studies so if he thinks the date of confirmation is traceable to the herm, then that seems like a pretty reliable source.
