

LaTeX - A Typesetting Mark-Up Language

Post by “Joshua” of June 26, 2021 at 1:45 PM

Let me also add;

I realize that using a mark-up language rather than, say, Google Docs, will impose a barrier to collaboration because most people won't want to bother learning the process. I don't blame them!

But you can still help me! As I get things moving, I will post the PDF's of my progress. At that stage, especially early on, I will need as much feedback and proofreading as I can get!
