

Sabine Hossenfelder - Why the Multiverse Is Religion

Post by "Cassius" of July 29, 2021 at 11:14 PM

"Bee" - Ha!

And Bingo THIS is what I was looking for from her:

Horgan: Steven Weinberg recently told me that science will never explain why there is something rather than nothing.

ADVERTISEMENT

Hossenfelder: I agree with him. It's not a scientific question, or at least I don't see how to make a scientific question out of it. Unless of course you want to reinterpret "nothing" as "quantum vacuum" as Lawrence Krauss does. I would argue though that even a quantum vacuum is still something.
