

# Early Epicurean Community - Listing of Known Epicureans Throughout History

Nate I haven't had time to go through the document in detail but I did notice the list of Epicurean communities. That topic gets raised frequently in terms of whether they constituted "communes" or how in fact they were organized (if at all, other than at least generally in regard to [PD39](#) and [PD40](#)).

My question was that I didn't pay close enough attention to see if you were able to find documentation for the locations on the list. Is there any kind of cross-referencing of those locations to text references so that people using the document can track where the list came from?

I know how hard it is to do all the documentation that is desirable to do so if it's not there we can just add that to the future [to-do list](#).
