

Issues In The Meaning And Definition of Logic

Post by “Mathitis Kipouros” of August 25, 2021 at 7:10 PM

[Quote from Cassius](#)

"logic based on nothing that can be verified through the senses."

But how can logic be verified through the senses, if it is completely a mental thing. Wouldn't it be, logic should be constraint to material issues? Or that if it has to fly a bit into the ether, it should have a grounding back into maerial reality, otherwise it would be plain speculation about things that don't exist?
