

Episode Eight-Seven - Earthquakes And The Water Cycle - The Reason The Seas Never Fill Up Over Time

Post by “Godfrey” of September 3, 2021 at 4:00 PM

This showed up in my feed and may be of interest in the near future. It's a (very) brief examination of the end of Book 6, in an historical context. I don't remember Sedley's conclusions and whether or not this reinforces his point of view but I'll toss this into the mix. BTW I didn't see him referenced anywhere in this paper.
