Do you have any specific references on those two categories (1) timeless sentences (2) future events?

Currently, my references are only in German:

Carl Friedrich von Weizsaecker's German original "Aufbau der Physik" of "The Structure of Physics", English edition by Thomas Görnitz, Holger Lyre, Springer Science & Business Media, 2007, ISBN 1402052359, 9781402052354:

https://books.google.co.th/books/about/The_Structure_of_Physics.html?id=DeexONN0zDgC&source=kp_book

In that book, the book "Quantum logic" from P. Mittelstaedt is referenced. I still have the notes from attending his lectures at University of Cologne about 35 years ago.

Some articles in "Physik Journal".
