

Personal Epicurean Knowledge Base Using Text (Markdown) Files

It occurs to me now that I have posted about this that it would be desirable to add Nate's book on the [Principal Doctrines](#) and Don's book on the letter to Menoeceus into the same local list of searchable files (included in the zip that we eventually distribute). It's easy to use the PDF version so that's probably the way to start, but at some point if the programs you guys are using to generate the PDFs have an "export to Markdown" or "export to txt" ability, I might ask you about that too. No need to worry about that now til you see further what I am suggesting.
