

Participants' Epicurean Book and Artifact Collections

[Bryan](#) two questions to start:

(1) what about the coin collection? Presumably those are mainly Roman and Greek coins. Are there any which have any kind of Epicurean connection? I suppose a coin that referenced Cassius Longinus would have a connection, but I don't think I have an idea of any other possible candidates unless stretching to include perhaps Antiochus since he is reputed to have had Epicurean leanings.

(2) Also as to the reproductions of the Tetrapharmakon -- is that something you did, or have museum reprints been made at some point in the past?

And a comment: I really like the linkage of the exhibits to references in De Rerum Natura!
