Once again though, if someone is going to make a concession that certain things in the universe might be authentic, i.e. The [Epicurean gods](#), then that person now has a burden of proving that those deities are in fact real and all other variety of deity are not authentic.

In my personal opinion, I do not believe it is possible to do this. If the EP gods stay, then so do the Hindu and Near-Eastern deities. Because similar arguments can be made to support their existence.
