[Quote from Cassius](#)

Thank you. What is this Nate?

These are translations of the *Kuriai Doxai* taken from William Wallace's book *Epicureanism* (1880). Like De Witt, he cites a number of them based on his personal translations from available sources, but in no particular order. He usually refers to the Doxai as "the Articles", but also uses "catechism" as a synonym (which I found to be really interesting).
