

Episode One Hundred Seven - The Epicurean Emphasis on Natural Science

Post by “Cassius” of January 30, 2022 at 4:35 PM

I have never found anything from Sedley that isn't worthwhile to read. I wish he'd done his own translations or his own equivalent to DeWitt's task of setting out the whole philosophy in one place. At this point he's the only academic I am aware of who could really attack that and do it justice.
