

Godfrey's Epicurean Outline

Post by "Godfrey" of December 22, 2018 at 8:24 PM

I am interested in those, as a matter of fact I'm planning to re-read Epicurus' letters for my next foray and eventually read Lucretius. It's quite interesting how EP relates to modern physics, although I'm not a scientist and beyond a certain point modern physics just blows my mind.

I live in a big city, near the beach. On a good night we can see 10-20 stars. 😞 We have a dog.
