

Home Page Changes

Post by “Cassius” of March 24, 2022 at 3:41 PM

Today (March 24th), we moved to the Home Page a section that was formerly on the ["Visitors" page](#).

The box that appeared near to the top of the page with a link to the Dashboard has now been replaced by a DASH entry in the very top menu.

Let us know if the changes cause any problems in your navigation or use of the page.

It probably makes sense to continue to suggest to people that after they get familiar with the home page they bookmark the DASHBOARD page as the best place to return to find all the latest content.

You can always return to the HOME page by clicking the main logo, which continues to appear at the top of every page.
