

# Reactions To "Hedeia" - Chapter Twelve of AFDIA

I got the impression that she is intended as a representation of the practical or even intuitive application of the philosophy, as opposed to the theorising of Leontium et al.

We just read a number of theoretical arguments and I think Hedeia is meant to remind the reader that at some point one needs to stop talking and start doing. If we eternally stay in the garden debating the nature of summum bonum, we are no better than Platonists.
