[Quote from Martin](#)

Therefore, a statement that Lucretius had no links with Epicureanism is not convincing

I shall try to translate one of the reviews of the book from French to English to give you a flavour of his arguments (mostly about patron-client relations). Although they don't convince me neither (but who am I), they are interesting to learn more about the circumstances. One of the favourite themes of Pierre Vesperini is that literature is studied without exhausting study of the circumstances. Conclusions are made from the lecture, while some historical details, often not well founded, are added, without evaluating the whole range of available evidence.
